About us

Captureforce is a boutique digital capture and post production company located in NYC. We provide a wide range of digital solutions and an unparalleled commitment to quality and artistic expression. Captureforce is established by Esben Hjort.

Personal Digital Tech

Who's answering the phone in the late evening when you have a technical question? – Do you know who to call?

We're always on call to answer your questions and respond to immediate requests. As a client, you have 24/7 access to our cell phones for any after hour tech support.

We have a comprehensive technical background in photography and years of experience providing excellent services to photographers in many challenging situations. We're frequent flyers and we've become as acquainted with working in photo-studios in Milano, on-location in South Africa, and on commercial sets in China, as we're with taking the Subway to Pier 59.

Digital equipment

Owning the equipment that we rent out has always been part of our philosophy. It's a simple and no-nonsense approach that allows us to service our clients with exceptionally high standards. Standards that include having 2 of everything, from digital cameras and digital backs to computers. This practice makes perfect when you consider the heavy usages to which professional cameras are exposed. In other words, we know a camera's history, and we can guarantee that it hasn't been dumped off at a rental-house the evening before, only to go out the next morning with glitches.

All our monitors and printers are color-calibrated to industry standards to ensure accurate colors throughout all phases of your workflow.

Insurance

In some cases, we ask for a certificate of insurance that covers the face value of the rented equipment.

Cancellations

Please contact us regarding any cancellations. Less than 48/h notice will incur a 100% charge.

All prices are subject to change without notice.
